Professional Summary

Aspiring Machine Learning Engineer and 3rd-year B.Tech (IT) student with foundational knowledge in artificial intelligence, data science, and predictive modeling using Python. Experienced in building academic projects involving NLP, data analysis, and automation while strengthening statistical and machine learning concepts. Seeking entry-level AI/ML opportunities to develop intelligent and data-driven solutions.

Technical Skills

- Programming Languages:** Python (NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn), SQL (Complex Queries), JavaScript
- Machine Learning & AI:** Supervised & Unsupervised Learning, Classification & Regression Models, Natural Language Processing (NLP), Feature Engineering, Hyperparameter Tuning
- Data Science & Analytics Tools:** Jupyter Notebook, Google Colab, Power BI, Tableau, Exploratory Data Analysis (EDA)
- Mathematics & Fundamentals:** Probability & Statistics, Linear Algebra, Calculus for ML
- Core Computer Science:** Data Structures & Algorithms, Object-Oriented Programming (OOP), Problem Solving
- Version Control & Cloud:** Git, GitHub, VS Code, Cloud Deployment Concepts

Education

Bachelor of Technology — Information Technology 2023–2027
Sanjivani College of Engineering, Kopergaon (Affiliated to SPPU)
CGPA: 7.94 / 10.00 (Top 15% of Class)

Higher Secondary Certificate (HSC) — Science 2022
Shri Samarth Uchha Madhyamik Vidyalaya, Lakh Khandala
Percentage: 77%

Projects

Fake Job Posting Detector | Python, NLP, Scikit-learn, Pandas GitHub Repo

- Engineered a machine learning classification model utilizing Natural Language Processing (NLP) techniques to accurately identify and flag fraudulent job postings.
- Executed comprehensive data preprocessing, feature engineering, and Exploratory Data Analysis (EDA) to extract critical text-based insights.
- Optimized prediction accuracy and model performance through rigorous evaluation metrics and hyperparameter tuning in Scikit-learn.

Interview Emotion Analyzer | Python, Computer Vision, Scikit-learn GitHub Repo

- Architected an AI-driven emotion recognition system designed to evaluate candidate confidence by analyzing complex facial expressions and vocal signals.
- Implemented computer vision algorithms and classification models to translate human-AI interaction data into actionable behavioral insights.

Personalized Learning Style Predictor | Python, Predictive Analytics GitHub Repo

- Developed a predictive analytics pipeline that ingests user behavioral data to dynamically suggest highly personalized learning methodologies.
- Leveraged advanced classification models to improve adaptive learning recommendations, enhancing overall educational engagement and retention.

Placement Trends Analyzer | Python, Power BI, Statistical Analysis GitHub Repo

- Analyzed massive, real-world placement datasets to uncover hidden hiring trends, skill demands, and industry recruitment patterns.
- Designed interactive data visualization dashboards and forecasting models to generate actionable insights for strategic career planning.

Certifications

- Artificial Intelligence Primer Certification
- Deep Learning for Developers
- Computer Vision 101
- Introduction to Natural Language Processing
- Python for Data Science Certification
- Statistical Inference using Python
- AWS Machine Learning Certification
- Generative AI and Prompt Engineering Certification
- Deloitte Data Analytics Internship Certification

Achievements

- **Participant – HackWithMumbai 2.0 (30-Hour National Level Hackathon)**
Bharati Vidyapeeth, Mumbai — Collaborated in a team-based rapid development environment to design and prototype a technical solution within strict time constraints.
- **National Finalist – Tata Technologies InnoVent 2026**
Selected among Top 31 teams from 2800+ national entries for developing an innovative engineering solution.
- **Bharat AI Expert Recognition – Global Fintech Fest 2025 (IIT Bombay)**
Recognized for contributions and proficiency in Artificial Intelligence applications.
- **Stage-2 Innovation Training – Tata Technologies**
Completed structured innovation training focused on product prototyping and design thinking.
