Professional Summary

Software Development Engineer aspirant and 3rd-year B.Tech (IT) student with foundational knowledge in full-stack development, REST APIs, and object-oriented programming. Experienced in building backend systems and web applications using Python, JavaScript, SQL, and modern development tools while strengthening Data Structures and Algorithms skills.

Technical Skills

- **Programming Languages:** Java, Python, SQL
- **Web Development:** React.js, Node.js, Express.js, HTML5, CSS3
- **Databases:** MongoDB, MySQL
- **Tools & Platforms:** Git, GitHub, Docker, Linux, VS Code, Google Cloud Platform (GCP)
- **Core Computer Science:** Data Structures & Algorithms, Object-Oriented Programming, Problem Solving (LeetCode / CodeChef)

Education

Bachelor of Technology — Information Technology

2023–2027

Sanjivani College of Engineering, Kopargaon (Affiliated to SPPU)

CGPA: 7.94 / 10.00 (Top 15% of Class)

Projects

Appointment Booking System (Full Stack) | React, TypeScript, Node.js, Express, REST APIs, Monorepo, Drizzle ORM GitHub Repo

- Designed and developed a scalable, full-stack appointment booking platform with user authentication, business management, and real-time scheduling.
- Built a responsive, component-driven UI using React, TypeScript, and Vite, with reusable components and protected authentication flows.
- Engineered RESTful APIs with Express and TypeScript, implementing robust authentication, modular route handlers, and secure business logic.
- Integrated Drizzle ORM for database schema management and automated seeding, ensuring data integrity and scalability.
- Architected and maintained a monorepo with pnpm workspaces, automating build, test, and deployment workflows for both frontend and backend.

Collaborative Whiteboard | React.js, Node.js, Express.js, WebSockets

GitHub Repo

- Built a real-time collaborative drawing application enabling multiple users to draw simultaneously using WebSockets for low-latency communication.
- Designed room-based session management to handle concurrent users efficiently.
- Optimized canvas rendering performance for smooth real-time synchronization.

Real-Time Chat Application | React.js, Node.js, Express.js, MongoDB

GitHub Repo

- Developed a real-time messaging platform with instant message delivery using Socket.IO.
- Designed RESTful APIs for user authentication and message persistence.
- Engineered scalable backend architecture to support multiple concurrent users.

MERN E-Commerce Platform | React.js, Node.js, Express.js, MongoDB

GitHub Repo

- Built a full-stack e-commerce platform with product listing, cart management, and order processing features.
- Implemented JWT-based authentication and role-based access control.
- Designed REST APIs and MongoDB schema for efficient product and user data management.

Certifications

Salesforce Trailhead – Trailmix Program Completion | February 2026

Earned multiple Trailhead badges through hands-on projects and platform configuration exercises.

Google Cloud Skills Boost – Cloud Engineering & Data Analytics Fundamentals

Infosys Springboard – Programming, Software Engineering Concepts

NPTEL – E-Business and Employment Communication

AICTE Virtual Internship – Conversational Data Analysis using LLMs

Achievements

- **Participant – HackWithMumbai 2.0 (30-Hour National Level Hackathon)**

Bharati Vidyapeeth, Mumbai — Collaborated in a team-based rapid development environment to design and prototype a technical solution within strict time constraints.

- **National Finalist – Tata Technologies InnoVent 2026**

Selected among Top 31 teams from 2800+ national entries for developing an innovative engineering solution.

- **Bharat AI Expert Recognition – Global Fintech Fest 2025 (IIT Bombay)**

Recognized for contributions and proficiency in Artificial Intelligence applications.

- **Stage-2 Innovation Training – Tata Technologies**

Completed structured innovation training focused on product prototyping and design thinking.
