Professional Summary

Aspiring Data Analyst and 3rd-year B.Tech (IT) student with foundational knowledge in data analysis, visualization, and statistical modeling using Python and BI tools. Experienced in analyzing datasets, creating dashboards, and generating actionable insights through academic projects. Seeking entry-level Data Analytics opportunities to support data-driven decision-making.

Technical Skills

- **Programming Languages:** Python (Pandas, NumPy, Matplotlib, Seaborn), SQL
- **Data Analysis & Processing:** Exploratory Data Analysis (EDA), Data Cleaning & Transformation, Statistical Analysis
- **Data Visualization & BI:** Power BI, Tableau, Advanced Excel
- **Databases:** MySQL, MongoDB
- **Core Concepts:** Probability & Statistics, Data Interpretation, Dashboard Design, Data Storytelling, KPI Tracking
- **Tools & Environments:** Jupyter Notebook, Google Colab, Git, GitHub, VS Code

Education

Bachelor of Technology — Information Technology 2023–2027
Sanjivani College of Engineering, Kopargaon (Affiliated to SPPU)
CGPA: 7.94 / 10.00 (*Top 15% of Class*)

Projects

Customer Trends Data Analysis | Python, SQL, Power BI GitHub Repo

- Built an end-to-end data analytics workflow involving data cleaning, SQL analysis, KPI tracking, and interactive dashboard creation.
- Analyzed customer purchasing behavior and sales trends using Python and SQL to generate actionable business insights.
- Developed Power BI dashboards for customer segmentation, revenue analysis, and trend visualization.
- Performed exploratory data analysis and reporting to support data-driven business decision making.

Retail Data Engineering Pipeline | Databricks, Python, SQL, Spark, Amazon S3

- Developed an end-to-end ETL pipeline using Databricks and Spark for consolidating retail datasets into a unified lakehouse architecture.
- Implemented Medallion Architecture workflows for data ingestion, transformation, and processing across multiple layers.
- Worked with Amazon S3, SQL, and Spark transformations to process structured business datasets efficiently.
- Generated analytical outputs and BI-ready datasets for reporting and visualization workflows.

SQL Pizza Sales Analytics Project | SQL, Data Analysis, Reporting

- Performed end-to-end sales analysis using SQL queries involving joins, aggregations, subqueries, and revenue calculations.
- Analyzed order trends, revenue contribution, customer preferences, and category-wise sales performance.
- Created analytical reports to identify top-selling products, daily sales patterns, and business growth opportunities.
- Applied advanced SQL concepts including GROUP BY, CTEs, window functions, and KPI analysis.

Certifications

- 365 Data Science Certification
- Deloitte Data Analytics Internship Certification
- Tata Data Analytics Job Simulation
- Google Cloud Data Analytics Track
- Godrej Data Analytics Training (Ongoing)
- Python for Data Science Certification

Achievements

- **Participant – HackWithMumbai 2.0 (30-Hour National Level Hackathon)**
Bharati Vidyapeeth, Mumbai — Collaborated in a team-based rapid development environment to design and prototype a technical solution within strict time constraints.
- **National Finalist – Tata Technologies InnoVent 2026**
Selected among Top 31 teams from 2800+ national entries for developing an innovative engineering solution.
- **Bharat AI Expert Recognition – Global Fintech Fest 2025 (IIT Bombay)**
Recognized for contributions and proficiency in Artificial Intelligence applications.
- **Stage-2 Innovation Training – Tata Technologies**
Completed structured innovation training focused on product prototyping and design thinking.
